### Instructions on how to use LATISSE™:

1. Once nightly, start by ensuring your face is clean, makeup and contact lenses are removed.
2. Remove an applicator from its tray. Then, holding the sterile applicator horizontally, place one drop of LATISSE™ solution on the area of the applicator closest to the tip, but not on the tip.
3. Then immediately draw the applicator carefully across the skin of the upper eyelid margin at the base of the eyelashes (where the eyelashes meet the skin) going from the inner part of your lash line to the outer part.
4. Blot any excess solution beyond the eyelid margin.
5. Dispose of the applicator after one use. Repeat for the opposite upper eyelid margin using a new sterile applicator. This helps minimize any potential for contamination from one eyelid to another.

I have read all of the LATISSE™ instructions on this form. I have been given a written copy and all of the instructions have been given to me verbally as well. I understand how to use LATISSE™.
